

Wisconsin Forward Health interChange System Managed Care Capitation Payment Rate Cells

Forward Health interChange System Capitation Payments

- Capitation payments are processed and stored as financial transactions and associated to five character intelligent keys called Rate Cells.
- Each Rate Cell has capitation rates defined for specific time periods.
- Rate Cells are built based on the following information: age, gender, HMO coverage, and medical status code
- The Rate Cell is based on demographic, managed care program and eligibility information and not based on a specific Managed Care Organizations
- One Rate Cell code will have different rates for each of the 6 distinct rate regions
- Access Rate Cell codes are outlined on the last page of this guide
