Medicaid SSI HMO
Care Management Benefit
Billing and Reimbursement Guide
Effective January 1, 2017
1.0 Medicaid SSI Care Management Billing and Reimbursement

1.1 Introduction

This Guide provides billing and reimbursement information for Health Maintenance Organizations (HMOs) providing care management services to Medicaid SSI members. HMOs must use this Guide in conjunction with the Contract for BadgerCare Plus and/or Medicaid SSI HMO Services since the Guide does not include a description of the care management model nor does it include specific care management requirements and definitions.

Note: If there are conflicts between this Guide and the Contract, the requirements stated in the Contract will prevail.

1.2 Contract Language

Refer to Article III.B. (Care Management Model for the Medicaid SSI Population) for the description and specific requirements of the SSI care management model, including model characteristics, infrastructure, and care management process.

1.3 Portal Location

This Guide is available on the ForwardHealth Portal at:

https://www.forwardhealth.wi.gov/WIPortal/content/Managed%20Care%20Organization/Reimbursement_and_Capitation/Home.htm.spage

1.4 Eligible Population

The eligible population includes all SSI enrollees with the exception of those members who are dually eligible for Medicaid and Medicare.

1.5 Effective Date

The effective date for the information included in this Guide is January 1, 2018.

1.6 Questions

Questions or disputes associated with the encounter data pull can be sent to the Bureau of Fiscal Management email box at: DHS DMS BFM (DHSDMSBFM@dhs.wisconsin.gov)

Questions regarding the SSI Care Management model requirements and definitions can be sent to the Bureau of Benefits Management email box at: DHS HMO Care Management (DHSHMOCareManagement@dhs.wisconsin.gov)
2.0 Reimbursable Care Management Activities

2.1 Reimbursable Activities

The Contract for BadgerCare Plus and/or Medicaid SSI HMO Services, Article III.B., describes the care management model required for all Medicaid SSI members. Care management activities are reimbursable when provided to, or on behalf of an identified member.

All care coordination activities must be identified in the member’s individualized comprehensive care plan. HMOs must retain documentation to support all claimed services.

2.2 Non-Reimbursable Activities

Care management activities are billable only when the activities meet the criteria identified in the Contract and in this Guide. The SSI care management benefit does not include the direct delivery of health or social services. Rather, the benefit includes activities related to identifying and linking SSI members to needed health and social services.

The activities identified below are not reimbursable under the SSI care management benefit and should not be billed under the care management benefit. The activities include, but are not limited to the following:

- Member outreach and engagement
- Care management activities not provided to, or on behalf of an identified member
- Care coordination and monitoring activities that are not identified in the member’s comprehensive, individualized care plan
- Case reviews for general quality assurance purposes
- Care management activities provided by non-team members
- Team meetings not specific to an identified member
- Staff training
- Wisconsin Interdisciplinary Care Team (WICT) team huddles
- Activities that duplicate an integral and inseparable component of another covered Medicaid service (for example, hospital discharge planning)

HMOs must not submit a care management claim for calendar months in which the only activities are non-billable activities.
### 3.0 Allowable Codes

#### 3.1 Valid Codes Required

HMOs are required to use valid and allowable codes for the SSI care management benefit. Wisconsin Medicaid and BadgerCare Plus recognize five Healthcare Common Procedure Coding System (HCPCS) procedure codes, two modifiers, and have limited restriction on allowable place of service codes.

#### 3.2 Procedure Codes

Wisconsin Medicaid and BadgerCare Plus will reimburse Medicaid SSI HMOs for the following allowable HCPCS procedure codes for the SSI care management benefit:

- G9001 – Coordinated care fee; initial rate
- G9002 – Coordinated care fee; maintenance rate
- G9006 – Coordinated care fee; home monitoring
- G9007 – Coordinated care fee; scheduled team conference
- G9012 – Other specified case management services not elsewhere classified

Because these are national codes, they do not specifically describe Wisconsin’s SSI care management benefit. Refer to Table 1 below for a crosswalk between the national HCPCS code description and the applicable activities under the SSI care management benefit.

#### 3.3 Modifiers

HMOs are required to stratify individual members upon enrollment to assign each member to the most appropriate care management stratum and as an input to develop an individualized, comprehensive care plan. Refer to the Contract for BadgerCare Plus and/or Medicaid SSI HMO Services, Article III.B., for a description of needs stratification.

Effective January 1, 2018, HMOs will be required to indicate one of three strata when submitting claims for care management services, low, medium or high. The highest stratum is designated for members receiving care management from the Wisconsin Interdisciplinary Care Team (WICT). If the member is stratified to,

- The lowest stratum – do not add a modifier
- The medium stratum – add Modifier –TF (Intermediate level of care) as indicated
- The highest stratum – add Modifier –TG (Complex/high tech level of care) as indicated. Refer to the Contract for BadgerCare Plus and/or Medicaid SSI HMO Services, Article III.B., for a description, structure and functions of the WICT.

*No More than One Modifier per Claim Detail*

HMOs must periodically reassess whether members are assigned to the most appropriate stratum. If the member is placed in more than one stratum during the billable month, the HMO
should select the stratum that represents the member’s placement during the majority of the billing period. This requirement applies to procedure codes G9002 and G9012. For codes G9006 and G9007, indicate the member’s stratum on the date of service.

Refer to Table 1 below for a summary of the allowable procedure code and modifier combination.

3.4 Place of Service Codes (POS)

HMOs are required to use the nationally-recognized POS code set for professional claims for the SSI care management benefit.

All valid POS codes are allowed for procedure codes G9001, G9002, G9007, and G9012. HMOs should use the most appropriate and specific code to represent the POS. When care management services are provided in multiple locations, HMOs may bill using the most frequently occurring POS code, or use POS –99 (Other Place of Service).

The POS codes for procedure code G9006 is limited to the following codes:

- 04 – Homeless Shelter
- 12 – Home
- 14 – Group Home
- 16 – Temporary lodging

Refer to Table 1 below for a summary of the allowable POS codes for each procedure code.

3.4 Diagnosis Code

Wisconsin Medicaid does not require a specific diagnosis code for care management services. HMOs are required to use valid, nationally-recognized ICD diagnosis codes when billing care management services.

3.5 Care Management Activities and Allowable Codes

Table 1 below provides a crosswalk between national code descriptions and SSI care management activities, indicates when a modifier is allowed, and identifies the allowable POS codes. Refer to the Reimbursement Policies section below for additional billing requirements.
Table 1 – Crosswalk of Care Management Activities to Allowable Codes

</table>
| G9002    | Coordinated care fee; maintenance rate           | Use this code when billing for activities related to the implementation and maintenance of the care plan. Examples of these activities are as follows:  
- Reviews and Updates to the Comprehensive Care Plan  
- Care coordination  
- Monitoring activities, including attending health care appointments with members, to ensure the care plan is implemented  
- Periodic re-assessments of the member’s needs  
- Making and following up on referrals  
- Time spent documenting care coordination activities  
When these activities take place in the member’s home, HMOs may bill procedure code G9006.  
Refer to the “Contract for BadgerCare Plus and/or Medicaid SSI HMO Services” for specific requirements related to reviewing and updating the comprehensive care plan. | –TF –TG | No Restriction |
| G9006    | Coordinated care fee; home monitoring            | Use this code when billing for home visits related to the implementation and maintenance of the member’s care plan.  
Refer to the “Contract for BadgerCare Plus and/or Medicaid SSI HMO Services” for specific requirements related to reviewing and updating the comprehensive care plan. | –TF –TG | POS limited to the following codes:  
- 04 – Homeless Shelter  
- 12 – Home  
- 14 – Group Home

4.0 Reimbursement Policies

4.1 Reimbursement Policies and Limitations

The Contract for BadgerCare Plus and/or Medicaid SSI HMO Services, Article III.B., includes the Contract requirements for providing care management services to SSI enrollees. HMOs must refer to the Contract in addition to the guidelines below when billing care management services. HMOs must retain documentation that supports the claimed services.

4.2 Units and Dates of Service

The unit of service for each allowable procedure code is always one. The date of service (DOS) varies, depending on the procedure code. Refer to the Additional Requirements section below for more DOS requirements, by procedure code.

4.3 Member Contacts

The HMO should make every effort to include the member in the care management process. In fact, to be billable, each procedure code includes a member contact element. If a member is unable to fully participate in a face-to-face or telephone contact, the HMO must document this information in the care plan (or other related document). To meet the requirement as a member contact, the documentation must include the following information:

- The authorized representative’s name and specific role in the care management process
- Whether the member’s designation is time limited (for example, temporarily while the member recuperates from an illness).

4.4 Additional Requirements

Below are additional requirements for each allowable procedure code.

**G9001 – Coordinated Care Fee; Initial Rate**
The initial rate includes five components, including the development of the comprehensive care plan. HMOs should bill this code only if the following components are provided:

1. The initial screening
2. Information gathering and assessment
3. Needs stratification
4. Care team assignment
5. Comprehensive care plan development

- Bill this code only if there is at least one member contact (face-to-face or telephone) during the care plan development process.
- HMOs may bill this code only once per calendar year, if appropriate
- The date of service (DOS) is the date the comprehensive care plan is developed.
- Modifiers –TF and –TG are not valid with this code.

Refer to the Contract for information related to timeframes and modes of contacts.

**G9002 – Coordinated Care Fee; Maintenance Rate**
The maintenance rate includes all activities related to implementing and keeping the member’s care plan up-to-date.

- This code is reimbursable for members with a comprehensive care plan.
- Bill this code only if there is at least one member contact (face-to-face or telephone) during the calendar month for which the HMO is billing.
- The HMO may add Modifier –TF or –TG when billing on behalf of members assigned to the medium stratum or a WICT.
- HMOs may bill this code only once in a calendar month, regardless of modifier.
- The DOS is the last date of care management activity in the calendar month.
- Procedure code G9002 is reimbursable in the same calendar month as codes G9001, G9006 and G9007.

Refer to the Contract for additional information related to the review and updates of the comprehensive care plan.

**G9006 – Coordinated Care Fee; Home Monitoring**
The home monitoring code represents care plan activities that occur in the member’s place of residence.

- This code is reimbursable for members with a comprehensive care plan.
- Bill this code only if the home visit resulted in a face-to-face contact with the member or the member’s authorized representative.
- Reimbursement for this code is limited to place of service, 04, 12, 14, and 16.
- The HMO may add Modifier –TF or –TG when billing on behalf of members assigned to the medium stratum or a WICT.
- The DOS is the date of the home visit.
- There is no limit on the number of times this code is billed in a calendar month. However, reimbursement is limited to a unit of one per DOS.
- Procedure code G9006 is reimbursable in the same calendar month as codes G9001, G9002 and G9007.

**G9007 – Coordinated Care Fee; Scheduled Team Conference**
This code represents team conferences scheduled to discuss a specific member’s care needs, as identified in her or his comprehensive care plan.

- This code does not include brief team huddles and impromptu gatherings.
- HMOs may bill this code only if the following individuals participate in the team conference:
  - The member and / or his or her authorized representative
At least one representative of the member’s care management team
Health or community care provider(s) instrumental to the implementation of the member’s care plan (e.g., community agency representative or health care professional).

Team conferences do not have to be face-to-face; but to be billable all required participants must be present at the meeting.

- Reimbursement for this code is limited to four units per member, per calendar month, regardless of modifier
- The DOS is the date of the scheduled conference.
- The HMO may add Modifier –TF or –TG when billing on behalf of members assigned to the medium stratum or a WICT.
- Procedure code G9007 is reimbursable in the same calendar month as codes G9001, G9002 and G9006.

**G9012 – Coordinated Care Fee; Other Specified Case Management Services not Elsewhere Classified**
This unspecified code represents the required transitional care management activities that the HMO must provide following an inpatient hospitalization.

- Bill this code only if there is at least one member contact (face-to-face or telephone) related to transitional care management following an inpatient hospitalization.
- Reimbursement for this code is limited to one unit per member, per hospital discharge, regardless of modifier
- The DOS is the last date of transitional care activity.
- The HMO may add Modifier –TF or –TG when billing on behalf of members assigned to the medium stratum or a WICT.
- Other care management services (i.e., G9001, G9002, G9006 and G9007) are not reimbursable during the same calendar month as transitional care.
- If the required transitional care management activities include: the initial screening; information gathering and assessment; needs stratification; care team assignment; and comprehensive care plan development, the HMO should bill G9001 instead of G9012.

Refer to the Contract for additional requirements related to transitional care management.

### 5.0 Reimbursement Terms and Amounts

#### 5.1 Introduction

HMOs should bill their usual and customary fee for care management services. Wisconsin Medicaid and BadgerCare Plus will reimburse the lower of the amount billed or the Medicaid established fee for each allowable code. HMOs are not required to bill a member’s other insurance for this benefit since these activities are typically not covered by other insurance. HMOs must not charge a member copayment for this benefit.
### 5.2 Maximum Allowable Fees

Table 2 below, lists the maximum allowable fees, including an enhanced reimbursement fee for services provided to members assigned to a WICT. For each code, the unit of service is one and the reimbursement is a flat rate.

**Table 2 – Maximum Allowable Fees**

<table>
<thead>
<tr>
<th>Procedure Code</th>
