Brand Medically Necessary Drugs and Brand Before Generic Drugs

This table provides a list of drugs that have policy requirements for brand medically necessary (BMN) drugs or brand before generic (BBG) drugs.

Brand Medically Necessary (BMN) Drugs

Prescribing providers are required to handwrite “brand medically necessary” directly on the prescription or on a separate order attached to the original prescription for BMN drugs. Drugs identified with “Yes” in the Brand Medically Necessary Drugs column also require prior authorization (PA) for BMN drugs. Drugs identified with “No” in the Brand Medically Necessary Drugs column do not require PA for BMN drugs. Pharmacy providers should submit a Dispense As Written (DAW) 1 (Substitution not allowed by prescriber) on claims for BMN drugs when the prescriber has “brand medically necessary” handwritten on the prescription or on a separate order attached to the original prescription. Providers should refer to the Prior Authorization section of the Pharmacy service area of the ForwardHealth Online Handbook for complete policy and clinical criteria for BMN drugs.

Brand Before Generic (BBG) Drugs

Drugs identified with “Yes” in the Brand Before Generic Drugs column require an approved PA request. Providers should refer to the Prior Authorization section of the Pharmacy service area of the Online Handbook for complete policy and clinical criteria for BBG drugs.

Effective: October 8, 2020
