- Discussion:
The committee had discussion regarding the recent pricing and availability issues surrounding doxycycline hyclate and doxycycline monohydrate. Staff noted that they will continue to monitor the pricing and availability. Staff stated that only the lowest cost generic doxycycline monohydrate 50mg and 100 mg strengths are preferred. The committee noted that most prescribers do not indicate a specific doxycycline salt.

Rachel Currans-Henry and Rick Pope explained to the committee that the WHO guidelines indicate HIV treatment should be started early. New guidelines are expected late summer 2013. Current guidelines do not indicate Stribild as a preferred treatment. Staff consulted with DHS Public Health regarding Stribild's status. Public Health staff felt it would be a prudent approach to continue Stribild's non-preferred status until further guidelines are available.
