M 000	INITIAL COMMENTS On 03/06/2024, Surveyor conducted a standard survey and 1 complaint investigation. Complaint was unsubstantiated. One deficiency was identified. One of 1 deficiency was a repeat deficiency (see Statement of Deficiency LMMG11, dated 01/26/2022). Census: 4	M 000		
M 570	88.10(3)(l) Safe Physical Environment Individuals, except for correctional residents, have basic rights which they do not lose when they enter an adult family home. A resident shall have a safe environment in which to live. The adult family home shall safeguard residents who cannot fully guard themselves from environmental hazards to which they are likely to be exposed, including conditions which would be hazardous to anyone and conditions which would be or are hazardous to a particular resident because of the resident's condition or disability. This Rule is not met as evidenced by: Based on observation and interview, the provider did not ensure hot water was kept at a safe temperature for 1 of 1 bathroom. The water in the bathroom accessible to residents was measured 152° Fahrenheit (F). This is a repeat deficiency. See Statement of Deficiency LMMG11, dated 01/26/2022. Findings include:	M 570

M 570	Continued From page 1 On 03/06/2024 at 1:45 PM, Surveyor observed the hot water temperature in the bathroom. The temperature measured at 152° F. Administrator B confirmed the water temperature was 152° F. On 03/06/2024, at approximately 2:56 PM, Surveyor interviewed Licensee A who expressed surprise the water was "so hot." Licensee A reported s/he did not know why the water was measuring so hot, but stated they would immediately begin having staff test the water temperature monthly. "Exposure to hot water is a potential environmental danger for residents. Elderly residents and residents with mental and physical disabilities may have neurological conditions that prevent instant recoil from hot water. Because these individuals do not instantly react to dangerous temperature levels, they are at particular risk for injury. Hot water can cause scalding, e.g., second and third degree burns in which the skin blisters and swells. In such instances, skin does not return to normal and forms scar tissue upon healing. These burns may lead to permanent disability." (DQA Publication-01942, Hot Water Temperatures in Adult Family Homes, August 2017.)	M 570
