This article is a reprint of *Wisconsin Medicaid and BadgerCare Update* 2007-12, published in February 2007.

Wisconsin Medicaid will not implement the National Provider Identifier (NPI) on May 23, 2007. Providers are required to continue to indicate their eight-digit Medicaid provider number on all electronic and paper claims and other transactions (e.g., prior authorization) submitted to Wisconsin Medicaid on and after May 23, 2007. **Claims submitted without an eight-digit Medicaid provider number will be denied.** This requirement will continue until providers are notified otherwise in a future *Wisconsin Medicaid and BadgerCare Update*.

Providers may include their NPI on electronic (837 transactions) and paper claims submitted to Wisconsin Medicaid; however, the NPI will not be used for processing. For proper processing, providers must continue to include their proprietary, eight-digit Medicaid provider number.

Providers who submit claims to Wisconsin Medicaid using the National Council for Prescription Drug Programs (NCPDP) transactions must continue to indicate their eight-digit Medicaid provider number.

Providers who submit claims to Wisconsin Medicaid using the free Provider Electronic Solutions (PES) claims submission software must continue to indicate their eight-digit Medicaid provider number. The software is not being modified at this time to accommodate the inclusion of the NPI.

Note: This information is specific to Wisconsin Medicaid and SeniorCare. Other payers may have different requirements.
