Overview

The State of Wisconsin Department of Health Services (DHS) engaged Milliman to provide annual hospital rate-setting services for its Medicaid inpatient and outpatient payment methodologies. This work includes annual updates to DHS' inpatient All Patient Refined Diagnosis Related Group (APR DRG) and outpatient Enhanced Ambulatory Patient Group (EAPG) patient classification versions. As part of its ongoing stakeholder engagement in support of hospital rate-setting activities, DHS and Milliman are meeting with the Wisconsin Medicaid Advisory Hospital Group (MAHG) and the Wisconsin Hospital Association (WHA) on October 7, 2021 to present DHS' proposed rate year (RY) 2022 Medicaid fee-for-service (FFS) hospital rates and estimated payment impacts. Milliman has performed this work under contract with DHS effective February 3, 2021.

RY 2022 (which is concurrent with Calendar Year 2022) hospital rate analyses accompanying this report represent DHS' proposed rate calculations for sharing with hospital stakeholders, subject to DHS' public comment period. Readers should reference DHS' prior June 30, 2022 MAHG meeting presentation, the Wisconsin Medicaid inpatient and outpatient state plan, and appropriate 3M APR DRG and EAPG documentation to understand the appropriate use of the information presented; this report should not be considered complete without the reader's reference to those documents.

Hospital payment methodologies included in the RY 2022 hospital rate-setting process are as follows:

- *Inpatient APR DRGs:* Inpatient acute services for both acute hospitals and critical access hospitals (CAHs), paid on a case rate basis (with outlier payments for extraordinary high-cost cases)
- *Inpatient per diems:* Inpatient specialty services carved out from the APR DRG methodology and paid a per diem rate as follows:
 - Psychiatric providers
 - Rehabilitation providers
 - Long-term acute care (LTAC) providers
- *Outpatient EAPGs:* Outpatient services for acute hospitals, CAHs, and psychiatric providers (excluding EAPG carve-out services paid under a fee schedule)

DHS' proposed key updates as part of the rebasing process are as follows:

- Update the patient classification grouper versions to APR DRG version 38 (from version 37.1) and EAPG version 3.16 (from version 3.15)
- Update the 3M™ national weights for both APR DRGs and EAPGs to match the new grouper versions, with normalization adjustments applied
- Update DRG and EAPG base rates and per diem rates, including:
 - For acute hospitals:
 - Update standardized amounts with inflation adjustments applied
 - Update wage index and graduate medical education (GME) adjustments to match the Medicare federal fiscal year (FFY) 2021 IPPS and new cost report data
 - For CAHs and services paid based on cost-based rates:
 - Update estimated cost target using calendar year (CY) 2019 claims data and overlapping cost report data
 - Implement new provider-specific cost-based outpatient EAPG base rates for psychiatric hospitals (currently paid under the acute EAPG base rate)

INPATIENT APR DRGs

Key payment policy parameters for Wisconsin's inpatient APR DRG payment methodology, as approved by the Centers for Medicare and Medicaid Services (CMS) in **Wisconsin State Plan Amendment (SPA) 4.19-A section 6000**¹, are shown in Figure 1 below. DHS' RY 2021 inpatient APR DRG rates and weights were developed by a prior contractor.

FIGURE 1 - WISCONSIN INPATIENT APR DRG PAYMENT PARAMETERS

DRG Payment Methodology Parameter	Current RY 2021 Description	RY 2022 DHS Proposed Approach
DRG Grouper	DHS currently uses 3M's APR DRG Grouper version 37.1 for RY 2021, which contains 330 valid DRGs, each with four severity of illness (SOI) levels from 1-Minor to 4-Exterme (1,320 total DRG and SOI level combinations).	DHS will update to version 38 for RY 2022.
DRG Relative Weights	DHS currently uses 3M's APR DRG version 37.1 "standard" national weights, normalized by a factor of 1.3475 (in order to match modeled case mix under RY 2020 APR DRG version 36 weights).	DHS plans to update to version 38 "standard blended" national weights, normalized to modeled case mix under version 37.1, for RY 2022.
DRG Base Rates	<p>DHS currently has hospital-specific APR DRG base rates determined separately for general acute hospitals and CAHs. For general acute hospitals, DRG base rates contain a statewide standardized amount (currently \$6,590.26 for RY 2021), based on RY 2020 rates increased for inflation. The standardized amount is adjusted for differences in hospital wage indices and direct graduate medical education (GME) costs, as follows:</p> $\begin{aligned} &[(\text{Statewide standardized amount}) \times (\text{Non-labor portion}) \\ &+ (\text{Statewide standardized amount}) \times (\text{Labor portion}) \times (\text{Wage index})] \\ &+ (\text{Direct GME add-on}) \end{aligned}$ <p>The wage indices for RY 2021 are based on the Medicare inpatient prospective payment system (IPPS) wage indices effective for federal fiscal year (FFY) 2020.</p> <p>The default rate for new hospitals is based on the statewide standardized amount, without adjustments for wage index or GME add-ons.</p> <p>CAHs have provider-specific cost-based DRG base rates.</p>	<p>DHS proposes for RY 2022 to:</p> <ul style="list-style-type: none"> ▪ Apply an annual inflation update to the base rate standardized amount, based on changes in CMS inpatient market basket index levels ▪ Update GME add-ons using the most recently available Medicare cost report data from 3/31/2021 HCRIS extract ▪ Update wage indices to the FFY 2021 Medicare IPPS correction notice factors (or based on the county average for Medicare IPPS-exempt hospitals) ▪ For CAHs, update the cost-based DRG base rates using CY 2019 model claims data and overlapping Medicare cost report data, inflated to FY 2022 based on changes in CMS inpatient market basket index levels
DRG Policy Adjusters	<p>Wisconsin's APR DRG payment methodology includes DRG "Policy Adjusters," which enhance the DRG base payment for key Medicaid service lines where maintaining access to care is critical. Current policy adjuster factors for RY 2021 are as follows (highest qualifying adjuster is applied):</p> <ul style="list-style-type: none"> ▪ Neonate DRG: 1.30 ▪ Normal Newborn DRG: 1.80 ▪ Pediatric Age (17 and under): 1.20 ▪ Transplant DRG: 1.50 ▪ Level I Trauma Services Provider Trauma Designation: 1.30 ▪ Other Services: 1.00 (no enhancement) 	DHS has no planned methodology changes for RY 2022.

¹ <https://www.dhs.wisconsin.gov/mandatoryreports/mastateplan/4-19a.pdf>

DRG Payment Methodology Parameter	Current RY 2021 Description	RY 2022 DHS Proposed Approach
DRG Base Payments	<p>The base DRG per-discharge payment is calculated as follows:</p> <p>(DRG base rate) X (APR DRG relative weight) X (DRG policy adjuster)</p> <p>For transfer-out cases (where the patient is transferred to other short term general hospitals or inpatient institutions), the DRG base payment is prorated as follows (not to exceed the full DRG base payment):</p> <p>$[(\text{Full DRG base payment}) / (\text{DRG average length of stay})] \times (\text{Claim Length of Stay} + 1)$</p> <p>DRG payments (including outlier payments per next row) are subject to a charge cap.</p>	<p>DHS has no planned methodology changes for RY 2022.</p>
DRG Outlier Payments	<p>DRG outlier payments are made in addition to the base DRG payment for extraordinary high cost cases, where the estimated claim cost exceeds the base DRG payment by the cost outlier threshold. Outlier payment formulas are as follows:</p> <ul style="list-style-type: none"> ▪ Claim cost: (Claim billed charges) X (Outlier cost-to-charge ratio) ▪ Outlier criteria: If (Claim cost) - (DRG base payment) > (Cost outlier threshold), the claim qualifies for an outlier payment ▪ Outlier payment: $[(\text{Claim cost}) - (\text{DRG base payment}) - (\text{Cost outlier threshold})] \times (\text{Marginal cost factor})$ <p>Cost outlier thresholds are calculated separately for general acute hospitals (\$46,587 in RY 2021) and CAHs (\$300 in RY 2021). There are separate marginal cost factors for SOI levels 1 and 2 (80% in RY 2021) and SOI levels 3 and 4 (95% for FY 2021).</p>	<p>DHS plans for RY 2022 to update outlier cost-to-charge ratios (CCRs) based on FFY 2021 Medicare IPPS outlier CCRs (or based on the estimated Medicaid aggregate CCR for Medicare IPPS-exempt hospitals). DHS has no other planned methodology changes for RY 2022.</p> <p>The default outlier CCR for new hospitals is based on the FFY 2021 Medicare IPPS default Wisconsin urban outlier CCRs.</p>

INPATIENT PER DIEMS

Key payment policy parameters for DHS’ current inpatient per diem payment methodology, per WAC 182-550-4300, are shown in Figure 2 below. DHS’ RY 2021 inpatient per diem rates were developed by a prior contractor.

FIGURE 2 – WISCONSIN INPATIENT PER DIEM PAYMENT PARAMETERS

Per Diem Methodology Parameter	Current Methodology	RY 2022 DHS Proposed Approach
DRG Carve-outs	<p>The following services are carved-out of the DRG payment system and paid on a per diem basis:</p> <ul style="list-style-type: none"> ▪ Psychiatric services ▪ Rehabilitation services ▪ Long Term Acute Care (LTAC) hospital services ▪ Ventilator assisted services ▪ Brain injury care services 	<p>DHS has no planned methodology changes for RY 2022.</p>

Per Diem Methodology Parameter	Current Methodology	RY 2022 DHS Proposed Approach
	<p>The following services are also carved-out of the DRG payment methodology and paid under a different payment methodology:</p> <ul style="list-style-type: none"> Department of Corrections services: paid based on the statewide average CCR Unusual cases (provider requests): alternative payment determined on a case-by-case basis Long-Acting Reversible Contraception (LARC): separate fee schedule 	
Per Diem Payments	Per diem payments are calculated as follows: (Per diem rate) X (Covered days)	DHS has no planned per diem payment changes.
Per Diem Rates	<p>Provider-specific average cost per day, based on model claims data and Medicare cost report data, inflated to the rate year. Current cost-based per diem rates have the following adjustment factors applied:</p> <ul style="list-style-type: none"> State-owned and operated psychiatric hospitals: 100% All other hospitals: 85.08% 	DHS plans to update the per diem rates using CY 2019 model claims data and overlapping Medicare cost report data, inflated to RY 2022 based on changes in CMS inpatient market basket index levels. DHS has no planned changes to the per diem adjustment factors.

OUTPATIENT EAPG RATES

Key payment policy parameters under Wisconsin's outpatient EAPG payment methodology, as approved by CMS in **Wisconsin SPA 4.19-B section 4200²**, are shown in Figure 3 below. DHS' RY 2021 outpatient EAPG rates and weights were developed by a prior contractor.

FIGURE 3 – WISCONSIN OUTPATIENT EAPG PAYMENT PARAMETERS

EAPG Payment Parameter	Current RY 2021 Description	RY 2022 DHS Proposed Approach
EAPG Grouper	DHS uses 3M's EAPG version 3.15 for RY 2021, which contains 603 valid EAPGs.	DHS plans to update to version 3.16 for RY 2022.
EAPG Relative Weights	DHS uses 3M's EAPG version 3.15 national weights for RY 2021, normalized by a factor of 2.0 x 1.0053 (in order to match modeled case mix under RY 2020 EAPG 3.14 weights)	DHS plans to update to version 3.16 national weights, normalized to modeled case mix under version 3.15, for RY 2022.
EAPG Base Rates	<p>DHS' EAPG base rates were determined separately for general acute hospitals and CAHs. For general acute hospitals, EAPG base rates contain a statewide standardized amount (currently \$89.54 for RY 2021), based on RY 2020 rates increased for inflation. The EAPG base rate is based on the sum of the standardized amount and each hospital's direct GME add-on).</p> <p>The default rate for new hospitals is based on the statewide standardized amount, without adjustments for GME add-ons.</p> <p>CAHs currently have provider-specific cost-based EAPG base rates.</p>	<p>DHS plans for RY 2022 to:</p> <ul style="list-style-type: none"> Apply an annual inflation update to the statewide standardized amount based on changes in CMS input price index levels Update GME add-ons using the most recently available Medicare cost report data from the March 31, 2021 HCRIS extract For CAHs, update the cost-based EAPG base rates using CY 2019 model claims data and overlapping Medicare cost report data, inflated to FY 2022 based on changes in CMS inpatient market basket index levels.

² <https://www.dhs.wisconsin.gov/mandatoryreports/mastateplan/4-19b-outpatient.pdf>

EAPG Payment Parameter	Current RY 2021 Description	RY 2022 DHS Proposed Approach
		<ul style="list-style-type: none"> ▪ For psychiatric hospitals, implement cost-based EAPG base rates developed using CY 2019 model claims data and overlapping Medicare cost report data, inflated to RY 2022 based on changes in CMS inpatient market basket index levels. The same adjustment factors would be applied as inpatient psychiatric per diem rates.
EAPG Base Payments	<p>The base EAPG per-visit payment is calculated as follows:</p> <p>(EAPG base rate) X (EAPG DRG relative weight) X</p> <p>(EAPG discounting factor)</p>	DHS has no planned methodology changes for RY 2022.
EAPG Discounting Factor	<p>Based on EAPG grouper output, select services are subject to “discounting” (adjusted by a factor of 50%) for various scenarios (multiple procedure, bilateral, and repeat ancillary). In addition, select routine ancillary services are “packaged” and \$0 paid (adjusted by a factor of 0%). Other services without adjustments for discounting or packaging are paid the full EAPG base payment (adjusted by a factor of 100%).</p>	DHS has no planned methodology changes for RY 2022.
EAPG Carve-outs	<p>The following services are carved-out of the EAPG payment system and paid on a fee schedule or per visit basis:</p> <ul style="list-style-type: none"> ▪ Therapy Services ▪ Clinical Diagnostic Laboratory Services ▪ Durable Medical Equipment (DME) ▪ Provider-Based End Stage Renal Disease (ESRD) Services ▪ County Jail Inmates 	DHS has no planned methodology changes for RY 2022.

Results

The RY 2022 hospital rate-setting model results are described below.

INPATIENT APR DRG GROUPEUR AND WEIGHT UPDATES

DHS is proposing to continue the current APR DRG payment methodology for RY 2022. Per its current inpatient payment methodology, DHS will continue to carve out inpatient psychiatric, rehabilitation, and LTAC services from APR DRG payment based on the provider type.

DHS proposes to update to APR DRG version 38, which has 332 total base DRGs each with 4 severity of illness (SOI) levels, resulting in 1,328 total classifications. Compared to DHS' current APR DRG version 37.1, two DRGs have been deleted and 438 new version 38 DRGs have been added, resulting in a net increase of 2 DRGs (or 8 total classifications). The deleted version 37.1 DRGs were for hip and knee joint replacement DRGs, split into elective vs. non-elective procedures. See **Appendix A** for a comparison of APR DRG version 37.1 vs. 38 DRGs and weights.

To evaluate the impact of updating APR DRG grouper versions, we calculated the APR DRG case mix under DHS' current version 37.1 weights (based on 3M™'s version 37.1 traditional national weights, normalized by a factor of 1.3475) and 3M™ version 38 traditional "blended" national weights. The 3M™ version 38 traditional blended weights are based on a mix of 50% "HCUP" data and 50% other national data sources (approximately 16 million calendar year 2016-2017 inpatient claims from Medicare, Commercial and Medicaid Plan data, Children's Hospital data, and a state dataset). The HCUP data is based on approximately 12.9 million inpatient claims from the 2016 and 2017 Agency for Healthcare Research and Quality (AHRQ), Healthcare Cost and Utilization Project (HCUP), and National Inpatient Sample (NIS) research datasets (20% sample of U.S. hospital discharges). DHS also considered the use of the 3M™ traditional weights based on HCUP data only, but selected the blended national weight version to minimize changes in case mix under version 38 compared to version 37.1.

Case mix represents the average level of acuity for a given set of historical experience and is calculated by dividing the sum of the APR DRG relative weights (assigned to CY 2019 inpatient model claims data based on the APR DRG assignment) by the number of CY 2019 model acute hospital claims, excluding transfer claims. At DHS' direction, we calculated the "normalized" case mix under APR DRG version 38. Normalizing the APR DRG weights involves the application of a statewide adjustment factor to the version 38 3M™ national weights to result in a target aggregate modeled case mix equal to version 37.1. Normalizing the national weights allows for consistent aggregate case mix and reduces volatility in changes in DRG base rates when updating APR DRG versions. Per 3M™ in its APR DRG documentation:

*[P]ayers and other users of 3M relative weights must therefore be careful to **scale (up or down) the 3M relative weights to fit the characteristics of each payer's unique population**...Changes to not only the APR patient classification, but also to the dataset used to compute the relative weights will have an overall impact on CMI.³*

For modeled case mix under version 38, we calculated a preliminary normalization factor of 1.1146⁴ such that modeled normalized case mix under APR DRG version 38 equaled modeled normalized case mix under APR DRG version 37.1 on a statewide basis, as shown in Figure 4:

FIGURE 4 - MODELED APR DRG CASE MIX AND NORMALIZATION FACTOR⁵

	Modeled APR DRG v37.1 Case Mix ⁶	Modeled APR DRG v38 (Un-normalized)	Modeled APR DRG v38 (Normalized)
Modeled case mix using CY 2019 data	0.9153	0.8211	0.9153
Modeled Normalization Factor	1.3475	1.0000	1.1146

³ 3M™ All Patient Refined Diagnosis Related Groups (APR DRG) Summary of Changes, version 38.0, 10/2/2020.

⁴ The calculation of this normalization factor excludes a subset of 49 inpatient maternity claims that required adjustments for compatibility with the APR DRG v38 diagnosis and procedure coding requirements.

⁵ Ibid.

⁶ RY 2021 APR DRG v37.1 weight normalization factor was developed by DHS' former contractor.

OUTPATIENT EAPG GROUPER AND WEIGHT UPDATES

DHS proposes to update to EAPG version 3.16, which has 648 total classifications. Compared to DHS' current EAPG version 3.15, 14 EAPGs have been deleted and 59 new version 3.16 EAPGs have been added, resulting in a net increase of 45 EAPGs. Deleted EAPGs mostly relate to laparoscopy, eye, cardiovascular, musculoskeletal, and gastrointestinal procedures and opioid treatment, split into new EAPGs with additional granularity. Other new EAPGs relate to former "inpatient only" procedures and blood products. See **Appendix B** for a comparison of EAPG version 3.15 vs. 3.16 EAPGs and weights.

At DHS' direction and consistent with DHS' current version 3.15 weights, we calculated the "normalized" case mix under versions 3.15 and 3.16. Similar to the process described for APR DRGs, normalizing the EAPG weights involves the application of a statewide adjustment factor to the version 3.16 3M™ national weights to result in a target aggregate modeled case mix equal to version 3.15. Normalizing the national weights allows for consistent total weights when updating EAPG versions for the new rate year, and reduces volatility in year-over-year changes in EAPG base rates. Per 3M™ in its EAPG documentation:

Care must therefore be taken to scale (up or down) the relative weights provided within the calculation to fit the average spend of the target population...Those using the national weights...should make sure that the absolute value of relative weights match the expected pattern for approved local spending and, if need be, scale relative weights so as to match that expectation while keeping relative differences constant.⁷

For RY 2022 EAPG version 3.16 weights, we calculated a preliminary normalization factor of $2.0 \times 1.0481 = 2.0962$, modeled such that the sum of normalized EAPG version 3.16 discount-adjusted weights equaled the sum of modeled normalized EAPG version 3.15 discounted-adjusted weights on a statewide basis, as shown in Figure 5:

FIGURE 5 – PRELIMINARY MODELED EAPG CASE MIX AND NORMALIZATION FACTOR

	Preliminary Modeled EAPG v3.15 (Normalized) ⁸	Preliminary Modeled EAPG v3.16 (With 2.0 Adjustment) ⁹	Preliminary Modeled EAPG v3.16 (Normalized)
Modeled case mix using CY 2019 data	1.5978	1.5244	1.5978
Modeled Normalization Factor	$2.0 \times 1.0053 = 2.0106$	2.0	$2.0 \times 1.0481 = 2.0962$

BASE RATE UPDATES

DHS proposes to update its acute hospital statewide standardized amounts for RY 2022 acute hospital inpatient DRG base rates and outpatient EAPG base rates for increases in cost inflation, as it has done in prior rate years. Standardized amounts are statewide case rates, separate for inpatient and outpatient, prior to hospital-specific adjustments (such as wage index and GME). Modeled RY 2022 standardized amounts, shown in Figure 6 below, are based on DHS' RY 2021 standardized amounts, inflated by 2.57% for inflation based on changes in CMS inpatient market basket index levels.

⁷ 3M™ Enhanced Ambulatory Patient Groups (EAPG) Summary of Changes, version 3.16, 1/21/2021.

⁸ RY 2021 EAPG weight normalization factor developed by DHS' former contractor.

⁹ DHS' EAPG national weight normalization has traditionally been calculated by multiplying 2.0 by an additional factor.

FIGURE 6 – MODELED STANDARDIZED AMOUNTS

Standardized Amount Type	RY 2021 Standardized Amount ¹⁰	Modeled RY 2022 Standardized Amount
DRG base rates	\$6,590.26	\$6,759.63
EAPG base rates	\$89.54	\$91.84

DHS plans to update cost-based rates (CAH, per diem, and outpatient psychiatric) using CY 2019 model claims data and overlapping Medicare cost report data, inflated to FY 2022 based on changes in CMS inpatient market basket index levels, with the adjustment factors described previously in Figures 1 through 3.

See **Appendix A** (inpatient) and **Appendix B** (outpatient) for modeled RY 2022 rate calculations across service types.

PAYMENT SIMULATION AND ESTIMATED PAYMENT IMPACTS

To evaluate the RY 2022 hospital payments impacts, we simulated payments under both RY 2021 and RY 2022 Medicaid FFS hospital rates, using CY 2019 Medicaid hospital FFS claims and Health Maintenance Organization (HMO) encounter data, submitted to the MMIS through May 2021. We have summarized estimated payment impacts at the service line and provider level, as shown in **Appendix A** (inpatient) and **Appendix B** (outpatient).

Statewide aggregate estimated inpatient payment changes are shown in the Figure 7 below.

FIGURE 7 – AGGREGATED MODELED INPATIENT PAYMENTS BY PROVIDER TYPE

Provider Type	Simulated Inpatient Payments Under RY 2021 Medicaid FFS Rates	Simulated Inpatient Payments Under RY 2022 Medicaid FFS Rates	RY 2022 Notes
Critical Access Hospitals	\$ 53,080,839	\$ 55,763,306	DRG base rates based on 100% of estimated CY 2019 model claims cost, inflated to RY 2022
Per Diem (Psychiatric, Rehabilitation, and LTAC providers)	\$ 103,307,553	\$ 112,572,689	Per diem rates based on 85.08% of estimated CY 2019 model claims cost, inflated to RY 2022 (state-owned based on 100%)
Acute Hospitals	\$ 876,296,221	\$ 885,470,736	DRG base rate based on the standardized amount inflated to RY 2022 based on changes in CMS market basket levels and adjusted by updated wage indices and GME add-ons
Total	\$1,032,684,613 (A)	\$1,053,806,731 (B)	
Total Estimated Payment Change	\$21,122,118 (B-A)	2.05% (B-A)/A	

Statewide aggregate estimated outpatient payment changes are shown in the Figure 8 below.

¹⁰ RY 2021 standardized amounts developed by DHS' former contractor.

FIGURE 8 – AGGREGATED MODELED OUTPATIENT PAYMENTS BY PROVIDER TYPE

Provider Type	Simulated Outpatient Payments Under RY 2021 Medicaid FFS Rates	Simulated Outpatient Payments Under RY 2022 Medicaid FFS Rates	RY 2022 Notes
Critical Access Hospitals	\$ 125,571,572	\$ 127,296,397	EAPG base rates based on 100% of estimated CY 2019 model claims cost, inflated to RY 2022
Psychiatric Hospitals	\$ 782,678	\$ 3,520,332	EAPG base rates based on 85.08% of estimated CY 2019 model claims cost, inflated to RY 2022
Acute and Rehabilitation Hospitals	\$ 238,237,128	\$ 242,986,891	EAPG base rate based on the standardized amount inflated to RY 2022 based on changes in CMS market basket levels, and adjusted by updated GME add-ons
Total	\$ 364,591,378 (A)	\$ 373,803,619 (B)	
Total Estimated Payment Change	\$ 9,212,241 (B-A)	2.53% (B-A)/B	

Note LTAC hospitals did not have outpatient claim volume in our CY 2019 model data.

Key drivers of estimated payment impacts across hospitals from updating RY 2022 rates include the following:

- *Changes in case mix*: Changes in provider case mix from updating grouper versions due to the patient classification changes and relative weight changes.
- *Changes in base rates (acute)*: Changes in provider base rates due to changes in statewide standardized amounts, wage indices, and GME add-ons.
- *Changes in base rates (cost-based)*: Changes in provider base rates due to updates to the provider-specific cost target and applied inflation adjustment.

Methodology

Our approach for modeling payments under modeled RY 2022 rates is described in the steps below.

STEP 1: DEVELOP RY 2022 MODEL CLAIMS DATASETS

To estimate payment impacts under RY 2022 rates, we used Medicaid inpatient and outpatient FFS paid claims and HMO encounter data with CY 2019 service from dates received from DHS and submitted to the MMIS through May 2021. We created an extract, transform, and load (ETL) process to combine these Medicaid inpatient FFS claims and HMO encounter data into a single dataset. Our analysis excluded Medicare crossover claims, out-of-state non-critical border hospitals, voided and other non-final action claims (where there was a subsequent resubmitted claim), duplicate claims, and fully denied FFS claims or HMO encounters.

Using this data, we conducted the following steps:

- Where interim billing occurred (multiple claims for same patient stay), we conducted an interim bill merge process to establish a single discharge record per patient stay
- Updated newborn encounter and claim records for age and Member ID corrections
- Merged Medicare ID to claim record based on billing NPI
- Processed claims under 3M™ Core Grouping Software to assign APR DRGs and EAPGs
- Merged 3M™ service lines based on patient classification
- Merged 3M™ national relative weights (APR DRG and EAPG) and geometric mean length of stay (inpatient only)
- Merged RY 2021 rates and outlier CCRs effective during CY 2019, based on provider NPI
- Identified and removed incomplete records/missing values, ungroupable patient classifications, outpatient EAPG carve out services, and denied lines

STEP 2: ESTIMATE CLAIM COSTS

Using the merged CY 2019 model claims data, we estimated claim costs at the detail level using the Milliman Hospital Costing tool as follows:

- Merged revenue code crosswalk to claims detail data
- Calculated each hospital's all-payer ancillary CCRs and routine cost per diems, by standard cost center, using fiscal year ending 2019 and 2020 Medicare cost report data extracted from CMS' Healthcare Cost Report Information System database (HCRIS, CMS' electronic cost report database)
- Merged cost center ancillary CCRs and routine cost per diems from CMS' Healthcare Cost Report Information System (HCRIS, CMS' electronic cost report database) to detail claims data using a revenue code crosswalk
- Identified detail line revenue codes without a Medicare cost report ancillary CCR or routine cost per diem and assigned a proxy CCR or cost per diem
- Estimated claim detail data costs and sum at claim header level
- Merged claim cost estimates to full model claims dataset
- Inflated CY 2019 model claims data cost to RY 2022 by a factor of 1.0724, based on changes in CMS inpatient market basket index levels

STEP 3: CALCULATE RY 2022 RATES

We calculated RY 2022 APR DRG base rates using the formula described in Figure 1. Rate components include the following:

- FFY 2021 Medicare IPPS labor share. For wage indices larger than 1.0, the labor portion is 68.3%. Otherwise, the labor portion is 62.0%.

- FFY 2021 Medicare IPPS wage indices. Per Wisconsin SPA 4.19 B section 6243, we extracted provider-specific Medicare FFY 2021 IPPS wage indices information from CMS' Correction Notice "Table 2." Per SPA requirements, for a hospital without a wage index published by CMS in the FFY 2021 Medicare IPPS data, we used a weighted average wage index for hospitals with Medicare IPPS wage indices in the same CBSA as the hospital without a Medicare IPPS wage index, based on CY 2019 Medicaid APR DRG model claim and encounter paid amounts.
- GME add-ons: Calculated by applying each teaching hospital's GME cost percentage to the case mix adjusted average Medicaid cost per inpatient claim (per step 2). We calculated GME cost percentages based on the most recently available Medicare cost report data from CMS' March 31, 2021 HCRIS extract. We then extracted the following cost report values from the HCRIS:
 - Total GME costs
 - Total GME non-allowable costs
 - Total hospital costs without GME

For inpatient APR DRG outlier CCRs, per Wisconsin SPA 4.19 B section 6330, we extracted the most recently effective provider-specific Medicare FFY 2021 IPPS operating and capital outlier CCRs from CMS' provider-specific file. Per SPA requirements, for a hospital without outlier CCRs published in the Medicare IPPS provider specific file, we calculated a hospital-specific outlier CCR using CY 2019 inpatient model claims data and overlapping Medicare cost report data (described in Step 2). For new hospitals without CY 2019 model claims data, the outlier CCR was based on the sum of operating and capital statewide outlier CCR defaults in the FFY 2021 Medicare IPPS.

We calculated RY 2022 outpatient EAPG base rates using the formula described in Figure 3. Rate components include GME add-ons, calculated using the same approach described previously for inpatient APR DRGs, except using CY 2019 outpatient model claims data.

We calculated RY 2022 CAH DRG and EAPG base rates by solving for rates needed to result in simulated RY 2022 payments equal to 100% of estimated costs, based on CY 2019 model claims data inflated to RY 2022 (per step 2). For CAHs where aggregate costs exceed charges in the Medicare cost report, for inpatient DRG base rates we used CY 2019 model billed charges, inflated to RY 2022, as the target (because DRG payments are capped at charges). For CAH outlier CCRs, we calculated outlier CCRs using hospital-specific CY 2019 inpatient model claims data and overlapping Medicare cost report data (described in Step 2).

STEP 4: SIMULATE PAYMENTS UNDER RY 2021 AND RY 2022 FFS RATES

For each claim in our inpatient APR DRG rebasing model dataset, we simulated the base DRG payment, and where applicable, the transfer payment adjustment and outlier payment, under RY 2021 and RY 2022 FFS rates using the pricing formulas described in Figure 1. For RY 2022 version 38 weights, we applied a normalization adjustment factor to 3M™ traditional blended national weights, modeled such that the modeled case mix under APR DRG version 38 equaled the modeled case mix under DHS' current APR DRG version 37.1 weights on a statewide basis (excluding transfer cases). When simulating outlier payments under both RY 2021 and 2022 FFS rates, we applied DHS' outlier CCRs effective during CY 2019 (to align the model billed charges with the CCRs), and then inflated the costs from the midpoint of CY 2019 to the midpoint of CY 2022 by 7.24% based on changes in CMS inpatient market basket index levels. If the simulated payment exceeded the inflated billed charges, we capped the simulated payment at the inflated billed charges amount.

For each claim in our inpatient per diem rebasing model dataset, we simulated the per diem payments by multiplying the applicable per diem rate by covered days, using the pricing formulas described in Figure 2.

For each claim detail line in our outpatient EAPG rebasing model dataset, we simulated the base EAPG payment under both RY 2021 and RY 2022 FFS rates using the pricing formulas described in Figure 3. For this calculation, we adjusted the relative weights by the EAPG discounting factor applicable to each EAPG version based on 3M™ software output. For rebased version 3.16 weights, we applied a new normalization adjustment factor to 3M™ traditional national weights, modeled such that the EAPG version 3.16 case mix (with discount adjustments applied) equaled the EAPG version 3.15 case mix on a statewide basis.

STEP 5: SUMMARIZE MODEL RESULTS

We summarized RY 2022 model results to evaluate the fiscal impacts of simulated payments under modeled RY 2022 rates compared to simulated payments under RY 2021 rates. Our RY 2022 model summaries, as shown in the

exhibits in **Appendix A** (inpatient) and **Appendix B** (outpatient), include summarized by 3M™ service line (for APR DRG and EAPG only) and by provider.

Data Sources and Assumptions

The RY 2022 hospital rate-setting model was developed using data from the sources described below.

WISCONSIN DHS STATE PLAN AMENDMENT

The Wisconsin DHS inpatient state plan 4.19A and outpatient state plan 4.19B were downloaded from the DHS website (see website links in the Overview section). These DHS documents describe the APR DRG and EAPG payment methodology and annual update process.

HOSPITAL CROSSWALK

Based on DHS' list of in-state and major border hospitals and hospital types, provided by DHS on March 11, 2021.

3M™ CORE GROUPING SOFTWARE

3M™ Core Grouping Software was used to process the Medicaid inpatient and outpatient claims data provided by DHS. We relied on accurate processing by the software, reviewed the software output for reasonableness, but did not audit the results.

3M™ NATIONAL WEIGHTS

We relied upon the following 3M™ national weight files downloaded from the 3M Core Grouping Software licensed user site:

- APR DRG version 37.1 standard weights: "apr371_wghts_Standard.xlsx" file
- APR DRG version 38 standard weights: "apr380_wghts_traditional.xlsx" file
- EAPG version 3.15 weights: "EAPG_3.15_nat_wts_Rev20200709.xlsx" file
- EAPG version 3.16 weights: "EAPG_3.16_nat_wts.xlsx" file

WISCONSIN MEDICAID FFS CLAIMS AND HMO ENCOUNTER DATA

DHS provided Milliman with Medicaid inpatient hospital FFS claims and HMO encounter data used in these analyses on February 4, 2021, extracted by DHS' Medicaid Management Information System (MMIS) vendor Gainwell. These claims included service dates in CY 2019 and paid through May 2021. We reviewed the provided data for reasonableness and compared our results to those of the prior contractor for the overlapping periods of our analyses (when possible), but we did not audit the data provided by DHS.

RY 2021 HOSPITAL RATES AND WEIGHTS

DHS provided Milliman with its current RY 2021 inpatient and outpatient hospital rates and weights, as developed by its prior contractor Guidehouse. We have relied upon these RY 2021 hospitals rates and weights without audit.

HCRIS DATA

We extracted CMS Form 2552-10 Medicare hospital cost report data from CMS' March 31, 2021 HCRIS release, downloaded from the CMS website.¹¹ For each Wisconsin hospital and major out-of-state border hospital, we extracted Medicare cost report data from reporting periods overlapping the CY 2019 model claims data, which was a combination of FYE 2019 and FYE 2020 cost report data.

We extracted the following key all-payer data points shown in Figure 9 below for each hospital:

¹¹ <https://www.cms.gov/Research-Statistics-Data-and-Systems/Downloadable-Public-Use-Files/Cost-Reports/Hospital-2010-form>

FFY 2021 MEDICARE IPPS FACTORS

We extracted the following FFY 2021 Medicare IPPS data:

- *Wage indices:* Medicare FFY 2021 IPPS wage indices based on the FFY 2021 Medicare IPPS Correction Notice “Table 2” and “Table 3” from the file “CMS_1735_F_CN_Tables 2, 3, 4A, 4B.xlsx” downloaded from the CMS website.¹²
- *Outlier CCRs:* Provider-specific outlier CCRs based on the “CCR” (operating CCR) and “CPCSTCHG” (capital CCR) fields from the FFY 2021 Medicare IPPS Provider Specific File “INPpsf2104.xls,” dated May 6, 2021, downloaded from the CMS website.¹³ FFY 2021 Medicare IPPS statewide default outlier CCRs were based on the file “CMS-1735-F Tables 8A, 8B, 8C.xlsx” downloaded from the CMS website.¹⁴

CMS MARKET BASKET INDEX LEVELS

We extracted Market Basket Index Levels for inpatient hospital services from the CMS file “Summary Web Table_2020Q4.xlsx,” developed by Global Insights and downloaded from the CMS website on June 22, 2021.¹⁵

Caveats and Limitations

The services provided for this project were performed under the signed contract between Milliman and State of Wisconsin Department of Health Services (DHS) effective February 3, 2021.

This report contains information produced, in part, by using the 3M™ Core Grouping Software, All Patient Refined Diagnosis Related Groups (APR DRGs), and Enhanced Ambulatory Patient Groups (EAPGs), which is proprietary computer software created, owned and licensed by 3M Company. All copyrights in and to the 3M Software are owned by 3M Company or its affiliates. All rights reserved.

The information contained in this report has been prepared for discussion purposes during a meeting between DHS, Milliman, the Wisconsin Medicaid Advisory Hospital Group (MAHG), and the Wisconsin Hospital Association (WHA) on October 7, 2021 to discuss DHS' planned changes for rate year (RY) 2022 (effective January 1, 2022) and to present preliminary supporting analyses. The modeled RY 2022 rates accompanying this report represent DHS' proposed approach and are subject to DHS' public comment period. Readers should reference DHS' June 30, 2022 MAHG meeting presentation, the Wisconsin Medicaid inpatient and outpatient state plan, and appropriate 3M APR DRG and EAPG documentation to understand the appropriate use of the information presented; this report should not be considered complete without the reader's reference to those documents.

We understand that this report will be shared with Wisconsin Medicaid hospitals and with WHA. To the extent that the information contained in this correspondence is provided to any approved third parties, the correspondence should be distributed in its entirety. Any user of the data must possess a certain level of expertise in health care modeling that will allow appropriate use of the data presented.

Milliman makes no representations or warranties regarding the contents of this correspondence to third parties. Likewise, third parties are instructed that they are to place no reliance upon this correspondence prepared for DHS by Milliman that would result in the creation of any duty or liability under any theory of law by Milliman or its employees to third parties.

Milliman has developed certain models to estimate the values included in this report. The intent of the models is to provide hospital stakeholders with select preliminary RY 2022 estimates for discussion purposes and for validating rate inputs for informational purposes. We have reviewed the models, including their inputs, calculations, and outputs for consistency, reasonableness, and appropriateness to the intended purpose.

The models rely on data and information as input to the models. We have relied upon certain data and information provided by CMS, 3M, Gainwell Technologies, Guidehouse, DHS, and DHS's provider and HMO partners for this purpose and accepted it without audit. To the extent that the data and information provided is not accurate, or is not complete, the values provided in this report may likewise be inaccurate or incomplete.

Milliman's data and information reliance includes the items outlined in the Data Sources and Assumptions section of this report. The models, including all input, calculations, and output may not be appropriate, and should not be used for any other purpose.

Differences between our preliminary estimates results and actual amounts depend on the extent to which future experience conforms to the assumptions made for these analyses. Future results may change from these estimates due to a number of factors, including final DHS policy decisions, changes to medical management policies, enrollment, provider utilization and service mix, COVID-19-related impacts, and other factors.

Appendix A – RY 2022 Inpatient Model Summaries

State of Wisconsin Department of Health Services Bureau of Rate Setting RY 2022 Modeled Inpatient APR DRG Acute Base Rates and Estimated Impact - Non-CAHs - By Hospital

Source Notes:
 A. Based on DHS RY 2021 inpatient DRG base rate file received on 6/9/2021.
 B. Based on simulated payments under RY 2021 rates, weights, outlier parameters, and transfer payment methodology using CY 2019 model FFS paid claims and HMO encounters.
 C. Based on the number of CY 2019 model FFS paid claims and HMO encounters, excluding Medicare crossover claims, \$0 paid claims, out-of-state non-border hospitals, and Critical Access Hospitals.
 D. Based on SMS APR DRG version 38 "standard blended" national weights, scaled by a factor of 1.1146 to result in the same appropriate modeled case mix as the RY 2021 APR DRG version 37 case mix. The ratio of case mix excluded transfer claims.
 E. Based on the RY 2021 standardized amount of \$6,590.26 inflated by 2.57% based on changes in CMS input price index levels from CY 2021 to CY 2022.
 F. Based on FFY 2021 Medicare IPPS wage indices (correction notice).
 G. Based on FFY 2021 Medicare IPPS labor portion percentages, with different percentages for wage indices above and below 1.0.
 H. Calculated.
 I. Based on the estimated Medicaid inpatient directed medical education cost per discharge, adjusted for scaled v38 APR DRG case mix.
 J. Calculated.
 K. Based on simulated RY 2022 APR DRG base payments using modeled RY 2022 DRG base rates, scaled v38 weights, and current policy adjuster factors and transfer payment methodology.
 L. Based on simulated RY 2022 APR DRG outlier payments using current outlier parameters and RY 2019 outlier CCRs. Outlier costs have been inflated by a factor of 1.0724 based on changes in CMS input price index levels from the CY 2019 model claims data period to CY 2022.
 M through P. Calculated.

State of Wisconsin

Bureau of Rate Setting
RY 2022 Modeled Inpatient Acute Base Rates and Estimated Impact - CAHS

Table with columns for Medicaid ID, Medicare ID, Hospital Name, City, and various financial metrics including RY 2021 Specific Base Rate, RY 2021 Modeled Payments, Number of CY 2019 Claims, APR DRG Scaled v38 Case Mix, and RY 2022 CCR. It includes a total row at the bottom.

Provider Note: 1. Hospital had total costs exceeding charges in the Medicare cost report; due to DHS' charge cap on inpatient claims, RY 2022 hospital-specific base rates were calculated using inflated billed charges as the target instead of estimated costs. The modeled outlier CCR has also been set to 1.0000. Modeled RY 2022 payments for these hospitals are slightly less than 100% of billed charges in aggregate because of the charge cap applied at the claim level.

Source Notes:

- A. Based on DHS' RY 2021 Inpatient DRG base rate file received on 8/9/2021.
B. Based on simulated payments under RY 2021 rates, weights, outlier CCRs, outlier payment parameters, and transfer payment methodology using CY 2019 model FFS paid claims and HMO encounters.
C. Based on the number of CY 2019 model FFS paid claims and HMO encounters, excluding Medicare crossover claims, 90 paid claims, out-of-state non-border hospitals, and Critical Access Hospitals.
D. Based on 3M's APR DRG version 38 "standard blended" national weights, scaled by a factor of 1.1146 to result in the same aggregate modeled case mix as the RY 2021 APR DRG version 37 case mix. The ratio of case mix excluded transfer claims.
E. Billed charges reported in the CY 2019 model claims data, inflated by a factor of 1.0724 based on changes in CMS input price index levels from the CY 2019 model claims data period to CY 2022.
F. Estimated cost of the CY 2019 model claims data, calculated at the detail line level using Medicare cost reporting data extracted from the HCRIS with reporting periods overlapping CY 2019, inflated by a factor of 1.0724 based on changes in CMS input price index levels from the CY 2019 model claims data period to CY 2022.
G. Modeled RY 2022 outlier CCRs based on the Medicaid aggregate cost to charge ratio, modeled using billed charges and estimated costs from the CY 2019 model claims data, unless otherwise noted.
H. Based on provider specific rates, solved for to result in modeled DRG payments equal to 100% of estimated costs, unless otherwise noted.
I. Based on simulated RY 2022 APR DRG base payments using modeled RY 2022 DRG base rates, scaled v38 weights, and current policy adjuster factors and transfer payment methodology.
J. Based on simulated RY 2022 APR DRG outlier payments using current outlier parameters and modeled RY 2022 outlier CCRs. Outlier costs have been inflated by a factor of 1.0724 based on changes in CMS input price index levels from the CY 2019 model claims data period to CY 2022.

Source Notes:
A. Based on DHS' RY 2021 inpatient per diem rate file received on 6/9/2021.
B. Based on simulated payments under RY 2021 per diem rates using days from CY 2019 model FFS paid claims and HMO encounters.
C. Based on the number of CY 2019 model inpatient FFS paid claims and HMO encounters paid under per diems, excluding Medicare crossover claims and \$0 paid claims.
D. Based on the sum of days from the CY 2019 model inpatient FFS paid claims and HMO encounters paid under per diems, excluding Medicare crossover claims and \$0 paid claims.
E. Estimated cost of the CY 2019 model claims data, calculated at the detail line level using Medicare cost reporting data extracted from the HCRIS with reporting periods overlapping CY 2019 (generally FYE 2019 and 2020).
Estimated costs have been inflated by 7.24% based on changes in CMS input price index levels.
F. Calculated.
G. Based on budget neutrality factors specified in the Wisconsin state plan.
H through L: Calculated.

 RY 2022 Modeled APR DRG Weights - Based on Normalized 3M Traditional Blended Version 38 National Weights

Policy Adjuster	Factor ⁽¹⁾
Normal Newborn	1.8
Transplant	1.5
Neonate	1.3
Level I Trauma Services	1.3
Pediatric	1.2
Remaining Service Lines ⁽²⁾	1

¹ When more than one adjuster applies to a claim, payment will be based on the adjuster that provides the highest enhanced payment

² Circulatory, Gastroenterology, Mental Health, Miscellaneous, Obstetrics, Respiratory and Substance Abuse receive no adjustment (i.e., multiplied by 1.0)

³ APR DRG Version 38 Traditional Blended National Weights are normalized using a factor of 1.1146 in order to match normalized Version 37.1 Case Mix Index

Source Notes:
A. Based on DHS' RY 2021 outpatient EAPG base rate file received on 6/9/2021.
B. Based on simulated payments under DHS' RY 2021 rates and EAPG v3.15 scaled weights using CY 2019 model FFS paid claims and HMO encounters.
C. Based on the number of outpatient visits in the CY 2019 model FFS paid claims and HMO encounters, excluding Medicare crossover claims, \$0 paid claims, out-of-state non-border hospitals, and Critical Access Hospitals, based on 3M EAPG grouper output.
D. Based on 3M's EAPG version 3.16 national weights, scaled by a factor of 2.0 X 1.0481 to result in the same aggregate modeled case mix as the RY 2021 EAPG version 3.15 case mix.
E. Calculated.
F. Based on the RY 2021 standardized amount of \$89.53509 inflated by 2.57% based on changes in CMS input price index levels.
G. Based on the estimated Medicaid outpatient directed medical education cost per visit, adjusted for scaled v3.16 EAPG case mix.
H through K: Calculated.
